To whom it may concern:

**Re: JavaScript/Font End Developer**

I'm writing as I wish to apply for this role as advertised on your website.

I currently work in a small unit of web developers as part of a larger media and design team. My current role and expertise includes:

1. **Creating tools** and functions in an agile work environment.
  - Creating and adapting splash pages for customers all over NZ.
  - Writing code that brings designer concepts and wireframes to life.
  - Manipulating API data to automate feedback to and from stakeholders.
2. **Solving problems** in content, design and/or functionality:
  - Creating and documenting global fixes for common issues.
  - Analysing and creating fixes for outlier issues.
  - Predicting and finding solutions to potential future problems.
3. **Evolving products** and processes:
  - Researching new development frameworks and ideas.
  - Creating standardised code templates and packages.
  - Creating backwards-compatible and future-proof code snippets.
  - Meeting with staff from different teams to improve user experience.
4. **Mentoring** web developers and new web designers:
  - Running coding tutorials for JavaScript, jQuery, CSS, Bootstrap.
  - Creating learning programs for external providers to teach our new intakes.
  - 1-on-1 mentoring and QA with two web developers.

Although not pertinent to my role, I also:

- Run our organisation's kapa haka groups:
  - Weekly waiata and Haka groups.
  - Kōnohete (inter-agency concert) group.
- Aid in the management and execution of cultural events e.g. Māori language week, Māori New Year, Pōwhiri and Pō Whakangahau.
- Aid in the management of corporate-social functions.

I would really appreciate an opportunity to discuss the requirements and expectations of the role further. Thank you for considering my application; I look forward to your response.

Yours sincerely,

**Daniel Nelmes-Love**
